Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment/Arguments

1. This action is in response to applicant's amendment/arguments received on 3/26/04.

Based on applicant's amendment, the rejection of claims 1-10 under 35 USC §101 is withdrawn. However applicant's arguments with respect to the rejection under 35 USC §112 is not persuasive. See remarks section for detail

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

Regarding independent claims 1 and 5-7, these claims recite in line 2, "performing a finite Radon transform on the higher moment data". In the specification, page 29, line 1, discusses higher moment data repository. However the specification does not discuss what is higher moment data and does not show distinction between higher moment data and other data such as image data made up of pixels. Claims 2-4 and 8-14 are dependent on claims 1 and 5-7. Therefore they are also rejected.

Remarks

4. In the amendment/arguments received on 3/26/04, applicant argued that:

Higher moment data represents statistical quantities that measure the tendency of a distribution to cluster around a certain value. In other words, higher moment data refers to higher correlation of data.

Examiner agrees that moment data represent statistical quantities. However, the specification does not discuss what is higher moment data and does not show distinction between higher moment data and other moment data or any other data. Examiner is not aware that higher moment data refers to higher correlation of data. Further applicant has not provided any evidence that higher moment data refers to higher correlation of data. Applicant has to define in the specification, higher moment data and what is distinction between higher moment data and any other moment data.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
